Beyond customizing your tiles to any stone type and size, StoneImpressions can customize any design to encompass your exact vision. From color alterations, to help planning your hard-to-fit spaces, contact us to futher explore your concept and receive a custom design quote.

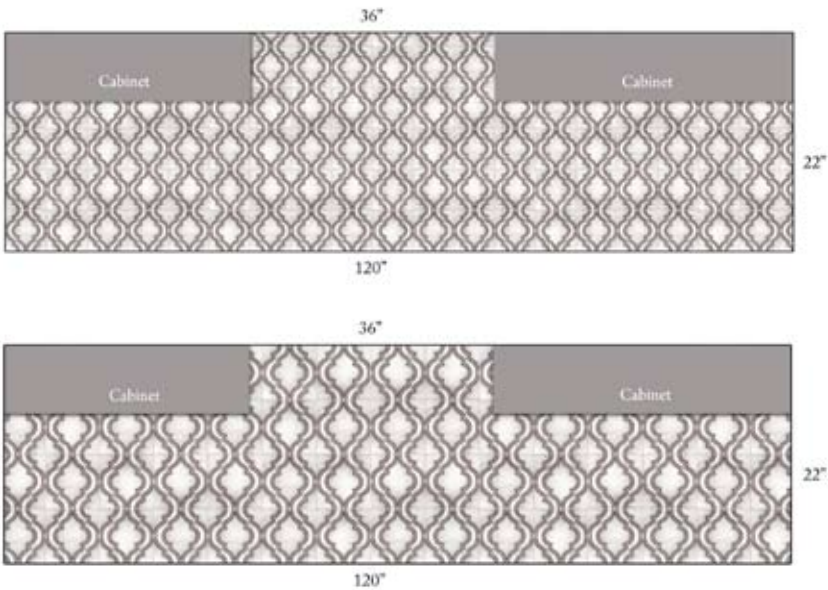

CUSTOM COLOR | Change, add or match any colors in any pattern. Strikeoffs are created for approval for any job involving custom color. Please contact us for custom design pricing.

CUSTOM CUTTING | Tiles may be cut to size to perfectly fit difficult or unconventional spaces. Please contact us for custom cut pricing.

CUSTOMIZE
STONE | Stone type may have the biggest effect on your selected design and is the simplest way to customize your project. Samples are available for any design on any stone type.

CUSTOM
SCALE
&
LAYOUTS | Pattern scales may be reduced or enlarged to suit your installation space and preference. Custom layouts are available upon request to show how a different scale or tile size can change the entire appearance of your space. For example, the layout above shows the difference between using the Pirouette pattern on a 6"x6" or 8"x8" tile and the different effect that is ultimately created.

STONE INFORMATION

	Carrara	Thassos	Ice Grey	Crema Ella	Limestone	Durango	Botticino	Light Travertine
Shade/Veining Variation	3	1	2	2	2	3	2	3
Notes				Suggested for use in wet areas in place of Limestone.	Not suggested for use in wet areas.	Available in both straight edge or filled, tumbled tiles.	Features a lightly tumbled edge.	Tiles are tumbled and unfilled.
Key: 1 = Little to No Variation 2 = Slight Variation 3 = Moderate Variation								
While StoneImpressions hand selects only the best natural stone for printed tiles, it is likely that field tile will contain a more distinctive variation among tiles in both color and natural veining. Please visit our website, www.stoneimpressions.com , to view the possible color and texture ranges of field tile.

StoneImpressions products are intended for interior vertical and low traffic residential flooring installations only. Not intended for use in water or in steam showers. Please read advisory below regarding using our tiles in wet areas*.

Tile surfaces should be protected from scratches and should be cared for as you would care for the finish of your kitchen appliances, for example your microwave, dishwasher, stove and refrigerator or a wooden floor. Our tile finishes are tough and durable, but need to be protected from scratching.

Inspection: Confirm that all products have been inspected and approved before installation begins. Installation of the product signifies acceptance. In the event that we ship incorrect material or fail to ship any portion of your order, you must notify us within 30 days of receipt of the package. Replacement items will be shipped at no cost via the same method that the items were originally shipped. Claims of damage must be reported within 48 hours of receipt of material. Freight companies require that all product, boxes and packing material be saved for inspection. Store tile in a dry area where temperatures do not dip below freezing.

Cleaning and Care: Stone is a natural product and care should be taken to protect it from harsh abrasive cleaners and abrasive cleaning tools. Its care and maintenance requirements are similar to how you treat a wood floor. Use a soft cloth, warm water and non-abrasive cleaner, such as mild soap. Avoid any care products which contain abrasives, phosphoric acids, scouring powders, chlorine, acetone or glycolic acids. Mild cleaning will preserve the stones for a longer time. Some acidic items, such as lemon juice and vinegar, can etch stone surfaces.

INSTALLATION

Tape:

Do not use tape of any kind on StoneImpressions products; this includes “Blue Tape”.

Sealing:

Seal before and after grouting with a high quality penetrating sealer (for example, Miracle Seal 511 Porous Plus, Oceancare Penetrating Sealer or Aquamix Sealers Choice Gold). We recommend that the tiles be sealed even if they are installed without grout. Test sealers first on a small sample of tile. StoneImpressions does not warranty, and will not be responsible for any claims regarding sealers.

Grouting:

We recommend non-sanded grout; however, sanded grout can be used with care. You should not use metal spatulas, trowels, or other tools. Instead use tools that are rubber, plastic or some combination of poly/rubber/plastic. We have not tested every grouting product on the market, so it is always advisable to test first. Grouting is a matter of personal preference. Grouting the entire image (especially with unfilled travertine) will fill the natural holes in the stone, causing the image to become randomly spotted with grout. A grout bag may be used to grout only the joint lines of the mural, thereby avoiding the spots of grout. A third option is to not grout at all. Simply position the tiles right next to each other. Talk to your tile installer about which method would be appropriate for your installation space.

*Advisory regarding installing natural stone products in wet areas: Stone is VERY porous. StoneImpressions products are highly water resistant, but are not waterproof. StoneImpressions tiles are sealed on the top surface only. The sides and back of the tiles are unsealed. If water seeps in from the sides or back, it will try to come out the front and become trapped between our sealer and the stone, forming blisters. For this reason, StoneImpressions products are not recommended for heavy wet use areas (i.e. on shower fixture walls, shower floors, steam showers). Do not use in any application where the tiles will be submerged in water.

If properly sealed, tiles may be used in areas with light moisture (where the product will be splashed but will not remain wet for extended periods of time). Examples of light moisture areas are tub surrounds or shower walls. A high quality waterproofing system such as the ones by Schluter and Laticrete must be used. The tiles also MUST be sealed on ALL six sides prior to installation by submerging tile in a high quality penetrating sealer for 5 minutes.

If installing on shower wall, keep at least 12 inches above shower floor and out of the direct line of constant water spray. It is especially important to re-seal on a regular basis. Follow the maintenance schedule recommended by sealer manufacturer. Test first on a small sample of tile.

Please refer to our Installation and Care Instructions for a complete description of care and use.

Variation and Uniformity: We have represented the color and character of the products in this catalog as accurately as possible; however, due to the inherent nature of the photographic and printing processes, there may be some variation in the colors or textures of the actual product from what appears on the printed page. Always contact an authorized StoneImpressions dealer for current samples before ordering. Variations of shade and color are inherent in any natural stone product. No two pieces are exactly alike. Certain types of stone tiles have naturally occurring holes or veins running through them. Your product will have surface variations throughout the design. All natural stones have unique natural variations and inclusions that are impossible to show in a photograph or sample. For this reason, all items should be unpacked and inspected prior to installation, as StoneImpressions cannot accept claims for variation in any stone after installation.

Damage in transit: External damage to the carton must be noted on the delivery receipt. It is your responsibility to inspect the boxes upon receipt and tell the shipping company about any damage. Damaged boxes do not always indicate damage to the contents, but it will simplify a claim if damage is discovered upon opening the carton. Please notify us of any damages within 48 hours of receipt of damaged items. Keep the damaged items and all packaging material so that they can be inspected by the shipper if necessary. We will make arrangements with you to return damaged pieces and send replacement pieces.

Returns: Due to the custom nature of our products, most items cannot be returned. StoneImpressions will allow returns at its own discretion. If a return is authorized for any reason other than defects or an ordering error on our part, a 30% restocking fee will be charged.

- All returns require prior authorization.
- No refund or replacement will be given for items returned without prior consent.
- We must receive returned merchandise in new, unused and undamaged condition in order for a replacement or refund to be issued. If returned goods are damaged in transit to us, no refunds will be made by us. We will notify the purchaser and the sender, but it is the responsibility of the sender to collect recompense from the shipper's insurer.

Disclaimer: PhotoStone LLC, dba StoneImpressions provides product information and information concerning certain installation procedures and maintenance practices to assist its customers in making selection, usage, installation, and maintenance decisions. It is the responsibility of the customer and/or the customer's installer to prepare any installation requirement to meet the owner/customer's approval. The customer's selection and usage of StoneImpressions products and the installation procedure and maintenance practice employed are outside the direction and control of StoneImpressions and are strictly and completely the choice and responsibility of each customer. StoneImpressions does not warrantee any product for any specific use, nor any installation procedure, sealant, or maintenance practice. StoneImpressions expressly disclaims all claims asserted after customer installation or usage of StoneImpressions products.
